NOTICE OF ALLOWANCE

Allowable Subject Matter

1. It is in the opinion of the examiner that the art of record does not render obvious “predetermining, from said stress/strain forming properties and the thickness of said sheet, a preform shape that is a deformation precursor of said article shape and includes at least one region in the preform shape that is to be strained up to, but not exceeding, the straining limit of the sheet material and the strain is higher than in adjacent portions of the preform shape and an annealing practice for re-softening the at least one region of said preform shape, said preform shape and said annealing practice enabling one step stamping of said article shape from said preform shape without exceeding the straining limit of the sheet; and thereafter stamping a blank of said sheet material into said preform shape using a punch and a forming surface tool where the at least one region is strained and formed by stretching the sheet in contact with the punch and forming tool; annealing at least said strain-hardened region of said preform by said annealing practice; and stamping said annealed preform to the shape of said article using a punch and a forming surface tool, the duration of said annealing step being no greater than twice the duration of either of said stamping steps” in combination with the rest of the claimed limitations set forth in the independent claim.

Searching by the examiner yielded additional prior art as cited in the previous Office Actions. Therefore, it is concluded by the examiner that claims 1-14 of the present invention are allowable.

Art Unit: 3725

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
